EDUCATION

Vellore Institute of Technology, Bhopal | 2022 – 2026

B.Tech in Computer Science Engineering (Specialization: Cloud Computing)

Relevant Coursework: Data Structures & Algorithms, DBMS, Cloud Computing, Operating Systems

TECHNICAL SKILLS

Languages: Java (Core Java, Java 8+, OOP), Python, SQL

Java Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate ORM, RESTful API Development

Databases: PostgreSQL

Security: OAuth2, JWT Authentication, Keycloak, RBAC

Tools & Infra: GitHub, Maven, Postman, IntelliJ IDEA, VS Code, AWS & Cloud

PROJECTS

Event Booking App | Java, Spring Boot, Spring Security, PostgreSQL, Keycloak, REST API

- Developed a backend system for event management including event creation, ticket booking, and user registration using REST APIs
- Implemented JWT-based authentication and role-based access control (RBAC) for Admin, Organizer, and User roles using Spring Security and Keycloak
- Built a QR-based ticket generation and validation system to streamline event check-in
- Designed database schema using PostgreSQL and managed persistence with JPA/Hibernate
- Added global exception handling and validation to improve API reliability

Smart Email Assistant | Java, Spring Boot, REST API

- Developed a Chrome Extension integrated with Gmail that generates AI-powered email replies using Google Gemini API, allowing users to select reply tone (Formal/Friendly/Professional) and auto-fill responses in the compose box
- Built a full-stack application using Spring Boot (backend REST API) and React.js with Material UI & Axios (frontend), handling end-to-end communication between the Chrome Extension and Gemini API securely
- Published the extension on the Chrome Web Store, gaining hands-on experience with Manifest V3, DOM manipulation, API integration, and full project deployment

Video-Gen: AI Video Generation & Scoring System | Python, FastAPI, Gemini API, REST API

- Architected a high-concurrency scalable backend using Python FastAPI to orchestrate AI video synthesis pipelines, supporting parallel processing and reducing generation latency for end users.
- Developed RESTful API endpoints integrating Gemini Flash 2.0 and Kling AI models for automated video analysis and metadata generation, cutting manual review effort significantly.
- Engineered a multi-metric automated scoring engine to evaluate AI-generated video quality, enforcing consistent output standards and reducing manual QA overhead by over 60%.

LEADERSHIP & ACHIEVEMENTS

Core Team Member - Software Development Club, VIT Bhopal: Spearheaded hackathons, coding sprints, and technical workshops on Java, Spring Boot, and microservices, upskilling 300+ students in modern backend development practices.

Core Team Member - AI Club, VIT Bhopal: Led hands-on AI/ML workshops and collaborative machine learning projects, promoting applied data science skills across campus.
